

ENVIRONMENTAL PROTECTION AND WASTE MANAGEMENT POLICY

Our business prioritizes environmental protection, pollution prevention, and reducing our negative impact on the environment. To achieve this:

- We comply with legal regulations and strive to reduce our environmental footprint.
- We carefully separate our waste according to its source, groups, and hazard classes.
- We understand that using hazardous substances and chemicals only when necessary and in required amounts will reduce negative environmental impacts and waste.
- We prefer materials with "recyclable" and "environmentally friendly" labels when making purchases, contributing to nature conservation and creating opportunities for reuse.
- We use disposable materials like paper, napkins, toilet paper, and packaging only as much as necessary to minimize waste and leave less impact on nature.
- We store and dispose of waste correctly in separate areas based on their characteristics, delivering them to licensed/authorized companies within legal storage time limits while keeping records.
- We strive to use water, energy, and all natural resources efficiently. We share this sensitivity with our employees, guests, and suppliers. We measure our environmental management performance, track this data with goals, and work to improve our performance.
- We aim to educate and increase awareness among our employees about environmental issues.
- We take necessary measures to preserve biodiversity in the environment and adhere to all legal requirements.
- Our contracted environmental engineer diligently monitors all our environmental activities.
